As banking or financial services, the settled payments are exempt from VAT provided VAT is not listed separately. VAT ID No.: Deutsche Bank AG, 60262 Frankfurt DE114103379

Important information for overrundings

Interest rate for overrundings 14.9 % p.a.

The interest rate on debit balances for overrundings is variable.

Applicable ECB interest rate 0.0 % p.a. in the month of the last interest rate adjustment: March 2016

If, on the next to last bank working day before the 15th of any calendar month, the minimum bid rate or interest rate on the main refinancing operations of the European Central Bank (hereinafter referred to as the ECB interest rate) has been increased by more than 0.20 percentage point on the interest rate in the month in which the last interest rate adjustment was made, the bank is entitled to raise the interest rate on debit balances for overrundings at its equitable discretion (§ 315 BGB - German Civil Code) by no more than the change in the ECB interest rate. Likewise, the bank shall decrease the interest rate on overrundings at its equitable discretion at a minimum of the change in the ECB interest rate when said interest rate has been cut by more than 0.20 percentage point; the bank will exercise its discretion in the same way for both interest rate increases and decreases. Factors such as changes in the account holder's credit default risk, the bank's rating and internal cost calculations are disregarded when exercising the equitable discretion.

The interest rate adjustments are always carried out on the 15th of the calendar month (insofar as this is a bank working day in Frankfurt am Main) in which the changes have carried out. If the 15th of the calendar month is not a bank working day, the adjustment of the interest rate is postponed until the next bank working day. The bank shall notify the account holder of the adjusted interest rates on overrundings at regular intervals. Notification of the interest rate adjustment may also be carried out in the form of an entry in the account statement or periodic balance statement of the account on which the overrunning was availed of. The account holder may review the current ECB interest rate at any on the bank's premises or website at www.deutsche-bank.de/start. The ECB interest rate is also published in the Deutsche Bundesbank's monthly and annual reports, the daily press and other public media.

If the ECB interest rate is replaced by another interest rate to manage the liquidity situation in the money market, then the interest rate adjustment will be governed by this interest rate.

| Page | IBAN | BIC (SWIFT) | Currency | Settlement period |
|------|-----------------------------|-------------|----------|-------------------|
| 2/2 | DE26 1007 0024 0897 7787 00 | DEUTDEDDBER | EUR | 1. quarter 2021 |

Note: the main refinancing operations are the European Central Bank's most important monetary instruments with which it manages the interest rate and liquidity situation in the money market, and signals its monetary policy decisions (key policy rates). However, owing to the complexity of the bank's refinancing methodology, the interest rate does not reflect changes in refinancing conditions exactly.
